

# Morland & Newby Village Hall

A CASE STUDY WITH IAN BARNES, TREASURER.

Morland is a village and civil parish in the rolling hills of the Eden Valley in the Eden District of Cumbria, England. It lies within the historic county of Westmorland.

The village hall association got in contact with Charge My Street through the Charge My Street [website](#). The chargepoints were officially launched at the end of May 2021 by Daniel Heery, Director of Charge My Street as well as members of the village hall association.

Ian said "We thought the chargepoints would be a good facility for the village, there is a lot of housing without off-street parking, if anyone wanted to buy an Electric vehicle it would be very hard for them to charge it. We also have a lot of holidaymakers in the summer, we wanted to allow them to charge whilst visiting the village."

“ We became aware of Charge My Street when it was mentioned at one of the regular village hall meetings led by [ACTION with communities in Cumbria](#). ”

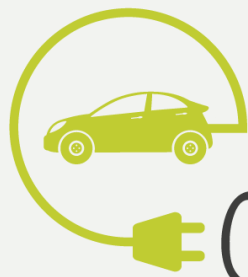

“We are currently looking at making the hall greener. We are considering replacing the boiler in the future with an air source heat pump. We are always looking for ways to become carbon neutral and the chargepoints are one way of achieving that”.

“Installation was very straightforward, the installers did an excellent job, they were very tidy and efficient.”

The chargepoints are now live and ready to use by residents or visitors of Morland. The chargepoints were installed by [BAY EV](#), a local installer based in Morecambe.

# CHARGE MY STREET

## STUFF TO DO

"The hall offers fitness classes, a ukulele group, indoor bowls, and parish council meetings to take place. There are lots of local walks in the area, the church is the only remaining Saxon tower in Cumbria. Drivers can make the short walk to a local café, the Mill Yard Café"

## DRIVER FEEDBACK

"I use the charger at Morland when visiting my mum. Having the points with dedicated parking spaces at the village hall is really convenient, and starting and ending a charging session is easy with the Fuse app. Having chargepoints in villages is great, as it means I can explore Cumbria whenever I visit without having to worry about finding a charger"- *Jez, regular driver.*
